- [Zotero Library](#). Assistive Listening System. 2400+ articles, legislation, presentations, research, tools, videos about assistive listening systems and telecoil information (webpage)
- Contact us about research projects needed; assistance and review provided upon request.

About the Center for Hearing Access

Founded in 2024, the Center for Hearing Access is a national, non-profit advocacy initiative educating and supporting consumers, audiologists, hearing instrument specialists, and facility staff about all ADA compliant assistive listening systems and other strategies to encourage continued community engagement and rewarding social, cultural, and meaningful experiences for people with hearing loss. The Center maintains a robust website with practical advocacy resources, including templates, videos, articles, vendor lists, 1000+ hyperlinks, and 150+ practical handouts. A 501(c)(3) non-profit, the Center refrains from endorsing any specific products, businesses or services by policy to ensure impartiality and to provide the most useful body of information to its targeted audiences.
