Sound Advice

# Information

## What is a hearing loop?

Hearing aids are necessary, but not sufficient for full hearing access across one's day.

A "hearing loop" is an assistive listening system for public and private spaces that transmits a distant sound directly to a telecoil/receiver in most hearing aids and cochlear implants.

## What is Sound Advice?

Free monthly workshops, designed to:

- provide opportunities to experience hearing loops,
- practice using your hearing device's telecoil program in a relaxed atmosphere;
- give time to discuss hearing loss challenges with others. *No products sold.*

## When is it?

Every second Saturday of the month from 10:00-11:30 am

## Who organizes it?

The Shedd Institute's Loop Oregon Committee is a group of community volunteers whose mission is to spread awareness of the benefits and the greater use of hearing loops in public and private places.

## How do I sign up?

Call The Shedd at 541-434-7000 to wregister or make a private appointment.
